Merative Cúram for Development Environment 8.X: Sandbox

CUR092

Course Description

This sandbox (remote lab) provides you with on-demand access to the Merative application development environment (ADE). This is the same environment that is used in the Merative Cúram for Developers (ADE) 8.X (CUR090) and Merative Cúram for Developers (Customization) 8.X (CUR091) courses. The sandbox environment includes a lightweight Cúram development installation, the Course Workshop, and the standard Cúram development installation. The Course Workshop allows you to experiment with development features quickly and safely.

General Information

Delivery Method: Sandbox (Remote lab).

Audience: This sandbox is aimed at developers and technical architects. It is particularly useful for those preparing for Merative Cúram V8.X, Application Development accreditation, Customization certification, or for anyone who wants to try out the development features of Cúram 8.X

Topics: This environment includes the following components:

- Merative Cúram Platform, which includes the ADE.
- Merative Cúram application modules.
- The lightweight Course Workshop environment.
- Standard third-party tools, including H2 as the development database and Eclipse as the integrated development environment (IDE).

Learning Objectives: Using this environment, learners will be able to do the following:

- Try out features of the Cúram ADE to create simple end-to-end solutions by using the Course Workshop.
- Implement solutions for exercises from the Merative Cúram for Developers courses.
- Implement solutions for the certification preparation case studies.
- Customize out-of-the-box applications compliantly by using the standard Cúram development installation.
- Perform gap analysis within Cúram to determine the changes required for customizations.
- Prepare for Merative Cúram V8.X, Application Development accreditation and Customization certification.

Prerequisites: Learners should have completed Cúram technical training:

- *Merative Cúram for Developers (ADE) 8.X and*
- *Merative Cúram for Developers (Customization) 8.X, or*
- *Any previous version of the Cúram Developer courses*

Duration: 50 Hours (within a 180-day period)

Skill Level: Intermediate

Version: This course was initially developed for Cúram 8.1.
