

**COURSE**

# Merative Cúram Development Environment 7.X for BAs: Sandbox

CUR096

**Course Description**

This Sandbox provides learners with on-demand access to the Merative Cúram SPM Platform V7.X development environment. This environment is used in the Fundamentals of the Merative Cúram SPM Platform for Business Analysts 7.X course (CUR072). The Sandbox enables students to explore some of the functionality and features covered by the course. The Sandbox is also useful for people who are preparing to take the Cúram V7.X BA Certification Test – C002.

**General Information**

**Delivery Method:** Self-paced.

**Audience:** This Sandbox is designed to help Cúram Business Analysts and other functional/admin personnel to use, and thereby familiarize themselves with, the Merative Cúram SPM Platform V7.X.

**Topics:** The course covers the following topics:

- User Interface Exercise
- Participant Management Exercise
- Case Management Exercise
- Financial Management Exercise
- SPM Administration Exercise
- Provider Management Exercise
- Outcome Management Exercise
- Rules Management Exercise
- Workflow Management Exercise
- Universal Access Exercise

- Learning Objectives:** After completing the course, learners should be able to:
- Launch the Merative Cúram SPM 7.X application and log in as different Cúram user types.
  - Perform the standard tasks associated with the main functional areas of the Cúram SPM Platform.
- Prerequisites:** Before accessing this Sandbox, learners should have completed Fundamentals of the Merative Cúram SPM Platform for Business Analysts 7.X (CUR072), or a previous version of the Cúram Business Analyst fundamentals course.
- Duration:** 50 Hours
- Skill Level:** Basic
