What's New? – We Have Something for Everyone!

- **NEW COURSE** – Merative Cúram Intro to Evidence (CUR110)
- **NEW COURSE** – Merative Cúram Evidence for Developers (CUR111)
- **NEW COURSE** – Merative Cúram Citizen Engagement Server-Side for Developers (CUR104)
- **NEW COURSE** – Merative Cúram GHHS Web Design System for Designers (CUR105)
- **NEW STUDY AIDS** – Business Analyst and Developer Knowledge Assessments (KAs)
 - Cúram V8.X BA Course: CUR088 Knowledge Assessment – Parts 1 to 3
 - CUR090_KA – Cúram for Developers (ADE) 8.X Knowledge Assessment
 - CUR091_KA – Cúram for Developers (Customization) 8.X Knowledge Assessment
- **NEW BADGE** – Merative Cúram Citizen Engagement Server-Side for Developers Badge
- **REMINDER** – Take Your Exam in a Test Center at no Extra Cost!

NEW Course CUR110 – Merative Cúram Intro to Evidence

This course provides learners with an introduction to Evidence in Cúram. It explores the essential concept of Evidence in Cúram, as well as how Evidence relates to Cases. Learners will appreciate what it means to manage Evidence within cases as well as the significance of what working with Temporal Evidence means in practice.

- **Course Delivery Format:** Self-Paced.
- **Course Duration:** 4 hours.
- **Prerequisites:** Before accessing this course, learners would have ideally completed *Fundamentals of the Merative Cúram Platform for Business Analysts 8.X (CUR088)*, or a previous version of the Cúram Business Analyst fundamentals course.

NEW Course CUR111 – Merative Cúram Evidence for Developers

This course provides developers with insights and hands-on experience of configuring Evidence in Cúram. It guides developers through how to define Dynamic Evidence in Cúram, as well as how to apply Dynamic Evidence Types to existing Case Types. Learners will appreciate what it means to configure the Evidence Broker and how to define and use Evidence Verification functionality.

- **Course Delivery Format:** Instructor-Led (recommended) or Self-Paced.
- **Course Duration:** 24 hours.
- **Prerequisites:** Before taking CUR111, learners should have completed the following courses:
 - CUR090 – Merative Cúram for Developers (ADE) 8.X

- *CUR110 – Introduction to Cúram Evidence*

NEW Course CUR104 – Merative Cúram Citizen Engagement Server-Side for Developers

This course provides learners with the technical skills needed to configure and customize server-side features of the Merative Cúram Citizen Engagement solution. Citizen Engagement allows individuals to explore and apply for relevant programs and manage their interactions with agencies through citizen accounts. It includes both server-side components, such as the Universal Access Application Module and client-side assets, that is, Cúram Design System and UA Web App. Throughout the course, learners will gain hands-on experience with the server-side configuration and technologies that support Citizen Engagement, but also internal screening and program applications that are performed by caseworkers.

- **Course Delivery Format:** Instructor-Led (recommended) or Self-Paced.
- **Course Duration:** Approx. 20 to 24 hours self-paced or 3 days instructor-Led.
- **Prerequisites:** Learners must have completed *Merative Cúram Technical Overview* before taking this course. An understanding of Intelligent Evidence Gathering (IEG), Cúram Express Rules (CER), and Cúram REST APIs is useful, but not essential, before taking this course. However, you should take courses in these topics to complete your understanding of Citizen Engagement Server-Side development.

NEW Course CUR105 – Merative Cúram GHHS Web Design System for Designers

This course introduces the learner to the following topics:

- Importance of user-centered design in the development of digital services and web apps
- Increasing number and impact of national web design systems
- Layout and contents of the U.S. Web Design System (USWDS)
- Fundamentals of the design process
- Merative Curam Government Health and Human Services Web Design System

The course explains the importance of design in the development of usable web apps and digital services. It also places the importance of design in the context of governments across the world setting up national web design systems. The course discusses the concept of web design systems and explains why governments worldwide are creating these systems. The course covers user-centered, iterative design processes, with a focus on Design Thinking. The course also introduces learners to the Merative Curam Government Health and Human Services Web Design System.

- **Course Delivery Format:** Instructor-Led (recommended) or Self-Paced.
- **Course Duration:** 5-6 hours approximately. This is an estimated completion time that consists of the lesson timings below and added time for revision and interruptions. The estimate also tries to account for the fact that each learner works at a different pace.
- **Prerequisites:** Learners should have a working knowledge of health and human services programs and experience of typical business analysis activities related to system implementations.

NEW Knowledge Assessments (KAs)

Knowledge Assessments (KAs) are new, quiz-based learning activities that help Cúram test takers to prepare for Cúram Certification.

The original idea for the **Business Analyst** KAs was developed over the years by Cúram Services personnel who were themselves preparing for BA Certification Tests, versions 7.X and 8.X. The Business KAs are the product of a true team effort that spans several years of engagement with Cúram releases.

The Education Team also provides **Developer** KAs, which originated from the readiness questions that mentors use and other sample questions that prepare candidates for Curam Developer Accreditation and Certification. The Developer KAs were also created in response to requests for more practice questions from candidates.

KAs enable Cúram test takers to:

- Supplement their own Cúram Certification Test preparation activities.
- Measure their readiness to take a Cúram Practice Test.
- Evaluate their knowledge of the contents of the associated course.

Each KA contains a quiz that consists of multiple-choice questions that are based exclusively on topics in the associated course book and exercise.

Note – All learners who are currently active course users have been automatically enrolled on the relevant KAs. If you submit a new course request, you will be enrolled in the relevant KAs. Anyone else who needs a KA can submit a request via the course request form <https://bit.ly/curamcourserequest>.

Cúram V8.X BA Course: CUR088 Knowledge Assessments

Together, we offer three KAs to provide Cúram V8.X BA Test candidates with a way to supplement their own test preparation activities by completing the following steps:

- Study the CUR088 Course Workbook and Exercise Workbook.
- Complete the *Review the Concepts* questions in the Exercise Workbook. The Cúram Education Team recommends that you should aim to be able to answer the questions correctly without referring to the Course Book.
- Take the Knowledge Assessments 1, 2, 3.

You can use your assessment results to measure your readiness to *before taking* the BA Practice Test. (P003)

CUR090_KA – Cúram for Developers (ADE) 8.X Knowledge Assessment

You can use this Knowledge Assessment to complete the following activities:

- Check your grasp of key Cúram developer concepts after completing Course CUR090 – You may find it helpful to refer to the course guide.
- Check your readiness to take the ADE Accreditation Practice Test (P004) and Accreditation Test (C004) – You should not use the course guide.

Candidates should complete Course CUR090 – Cúram for Developers (ADE) 8.X, or an earlier version of this course, before taking the assessment.

CUR091_KA – Cúram for Developers (Customization) 8.X Knowledge Assessment

You can use this Knowledge Assessment to complete the following activities:

- Check your grasp of key Cúram developer concepts after completing Course CUR091 – You may find it helpful to refer to the course guide.
- Check your readiness to take the Cúram V8.X Customization – Practice Test (P005) and Cúram V8.X Customization - Certification Test (C005) – Do not use the course guide.

Candidates should complete Course CUR091 – Cúram for Developers (Customization) 8.X, or an earlier version of this course, before taking the assessment.

NEW Badge CUR104_B – Merative Cúram Citizen Engagement Server-Side for Developers

This badge offers learners a chance to prove their knowledge of Cúram Citizen Engagement Server-Side Development by taking a quiz and configuring a feature in a lab environment. Learners should complete CUR104 Merative Cúram Citizen Engagement Server-Side for Developers before attempting the badge assessment. Alternatively, learners should have experience of configuring Citizen Engagement/Universal Access server-side features.

Reminder! – You Can Take Your Exam in a Test Center at no Extra Cost!

You can still take a Cúram Certification Test in your home or office. However, you now have the option to take your test in a Prometric Test Center, which are available at over 8,000 locations worldwide. You can use the Prometric scheduling system to check whether there is one near you. Browse to the [Merative | Prometric](#) page to make a Test Center appointment. For more information about Cúram Certification, visit the Cúram Education microsite.

Upcoming Releases - 2026

We are currently updating the Citizen Engagement front-end courses:

- *Merative Cúram Citizen Engagement Web Design System for Developers*
- *Merative Cúram Citizen Engagement UA Web App for Developer*
