1 Removed functionality

If you are upgrading from an earlier version of Merative™ Social Program Management, be aware of the features that have been removed from Social Program Management.

For more information about removed features, see the [Release Notes](#).

To assess whether your implementation of Social Program Management has any dependency on the removed features, run the Artifact Dependencies Search Tool, which is available to download from [Merative™ Support](#). You must be a technical contact to download software, open a support case if you need access. Click **SPM Software Download** and enter your technical contact credentials to download the software.

The following sections list features that have been removed from Social Program Management 8.1.0, alphabetically by name.

2.1 CPM Performance Monitoring

SPM-125963 tracks the deprecated Merative Provider Management (CPM) Performance Monitoring feature and related artifacts from the Social Program Management deliverable.

Main changes summary

The Merative Provider Management (CPM) Performance Monitoring functionality that provided the ability to configure performance measures and evaluation criteria for a provider to enable agencies to measure provider performance was deprecated in Social Program Management v7.0.0.0. The infrastructure was not used by customers and is being removed from the product deliverable.

- **Database tables removed**
 - ContractPerformanceMeasure
 - PerformanceMeasure
 - PerformanceMeasureLink
 - ScoreOutcome
 - SOPerformanceMeasureLink
 - SOPerformMsrEvalCrtLnk
- **Facade classes removed**
 - MaintainContractPerformanceMeasure
 - MaintainPerformanceMeasure
 - MaintainSOPerformanceMeasure
 - PerformanceMeasure
- **Domain definitions removed**
 - A number of domain definitions have been removed as a result of this exercise. See the detailed changes list below for the full list of these.
- **Struct classes removed**
 - A large number of struct classes have been removed as a result of this exercise. See the detailed changes list below for the full list of these.
- **Codetable files removed**
 - PerformanceMeasureApplicable
 - PerformanceMeasureOutput
 - PerformanceMeasureResourceType
 - PerformanceMeasureTypeHierarchy
- **Message files removed**
 - ContractPerformanceMeasure
 - PerformanceMeasure
- **UIM/VIM/property files removed**
 - A large number of UIM, VIM and associated property files have been removed as a result of this exercise. See the detailed changes list below for the full list of these.

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **EJBServer/components/CPM/codetable**

- **Removed**

- CT_PerformanceMeasureApplicable.ctx
- CT_PerformanceMeasureOutput.ctx
- CT_PerformanceMeasureResourceType.ctx
- CT_PerformanceMeasureTypeHierarchy.ctx

- **EJBServer/components/CPM/data/initial**

- **Removed**

- PERFORMANCEMEASURE.dmx

- **Edited**

- VALIDATIONCONFIGURATION.dmx: removed the references to performance measure

- **EJBServer/components/CPM/message**

- **Removed**

- ContractPerformanceMeasure.xml
- PerformanceMeasure.xml

- **Edited**

- BusinessObjectTypeName.xml: removed business object type of Performance Measure

- **EJBServer/components/CPM/properties**

- **Edited**

- ShortNames.properties: removed references to Performance Measure
- adapters.properties: removed references to Performance Measure

- **Model files**

- **Removed**

- EJBServer/components/CPM/model/Packages/Façade/Performance Measure/MaintainPerformanceMeasure_cat.efx
- EJBServer/ components/CPM/model/Packages/Service Layer/Performance Measure/Entity/Entity_cat.efx
- EJBServer/ components/CPM/model/Packages/Service Layer/Performance Measure/PerformanceMeasure_cat.efx

- **Edited**

- EJBServer/components/CPM/model/Packages/Façade/Domain Definitions_cat.efx: removed domains related to Performance Measure
- EJBServer/components/CPM/model/Packages/Façade/Façade_cat.efx: removed facades related to Performance Measure
- EJBServer/components/CPM/model/ Packages/Service Layer/Financials/Service Authorization/Service Authorization_cat.efx: removed facades related to Performance Measure

- EJBServer/components/CPM/model/Packages/Service Layer/Place Mangement/Placement/Placement_cat.efx: removed references related to Performance Measure
- EJBServer/components/CPM/model/Packages/Service Layer/Service Layer_cat.efx: removed references related to Performance Measure
- EJBServer/components/CPM/model/Packages/Service Layer/Service Delivery/ServiceDelivery.efx

- **Domain definitions**

- Removed**

- OUTCOME_SCORE
 - PERFORMANCE_MEASURE_APPLICABLE
 - PERFORMANCE_MEASURE_MEASURE
 - PERFORMANCE_MEASURE_OUTPUT
 - PERFORMANCE_MEASURE_RESOURCE_TYPE
 - PERFORMANCE_MEASURE_SEARCH_ID
 - PERFORMANCE_MEASURE_TARGET
 - PERFORMANCE_MEASURE_TYPE
 - SCORE_OUTCOME_OUTCOME

- **Struct classes**

2.2 Cúram Provider Management (CPM) taxonomy

SPM-125955 tracks the deprecated Merative Provider Management (CPM) taxonomy feature and related artifacts from the Social Program Management deliverable.

Main changes summary

The Merative Provider Management (CPM) taxonomy functionality that provided the ability to establish a hierarchy of terms and index those terms to provider service offerings for use in searching for services was deprecated in Social Program Management v7.0.0.0. The infrastructure was not used by customers and is being removed from the product deliverable.

2.3 Duplicated static application domain definitions

SPM-124484 tracks the removal of the deprecated duplicated static application domains from the Social Program Management deliverable.

Main changes summary

A number of domain definitions were duplicated by name in the list of static application and dynamic domain definitions. These duplicate static application domain definitions were deprecated in Social Program Management v7.0.0.0 and are being removed in this release.

- **Domain definitions removed**
 - ADDRESS_STATE
 - FREQUENCY_CODE
 - CW_MOTIVATION_RESULTS_MEMBER_STATUS
 - PLAN_LEVEL
 - CITIZENSHIP_STATUS_NO_IEG_OVERRIDE
 - FREQUENCY_CODE_NO_IEG_OVERRIDE

- Edited**

- webclient/components/core/domain-defaults.xml

2.4 Duplicated text translation screens

SPM-128390 tracks the removal of the duplicate localizable text screens from the Social Program Management deliverable.

Main changes summary

A number of UIM, VIM and related property files previously associated with the text translation functionality were duplicated across the "core" and "WorkspaceServices" components in the Social Program Management deliverable. The duplicate files present in the "WorkspaceServices" component have now been removed as part of this release.

- **UIM and VIM files removed**

- A number of UIM, VIM and previously associated property files have been removed as a result of this exercise. See the detailed changes list below for the full list of these.

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **webclient/components/WorkspaceServices/LocalizableText/UIM/VIM/property files removed/edited**

Removed

- LocalizableText_addRichTextTranslation.properties

- LocalizableText_viewLocalizableText.uim
- LocalizableText_viewLocalizableTextView.properties

2.5 ETLs (Oracle Warehouse Builder and Db2®)

SPM-124578 tracks the removal of the deprecated Oracle Warehouse Builder (OWB) and Db2® ETLs from the Social Program Management deliverable.

Main changes summary

The Oracle and Db2® ETLs were deprecated in Social Program Management v7.0.0.0 for several reasons. These included the version of Oracle Warehouse Builder that was used to create the Oracle ETLs going end of life and the ETLs in general not being used by Social Program Management customers. These deprecated ETLs are now being removed in this release.

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

2.6 EvidenceFlowDetails struct class

SPM-124580 tracks the removal of the deprecated struct class

`curam.core.facade.infrastructure.struct.EvidenceFlowDetails` from the Social Program Management deliverable.

Main changes summary

The struct class `curam.core.facade.infrastructure.struct.EvidenceFlowDetails` is applicable to the Evidence Flow feature. The feature was removed in Social Program Management v8.0.0.0. However, this struct was not removed as it had not been deprecated. It was deprecated in Social Program Management v8.0.0.0 and is therefore being removed in this release.

- **Struct classes removed**

- `curam.core.facade.infrastructure.struct.EvidenceFlowDetails`

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Model files**

- **Edited**

- `EJBServer/components/Intake/model/Packages/Facade/Facade_cat.efx`

2.7 Generic Search Server (GSS)

SPM-124580 tracks the removal of the deprecated Generic Search Server (GSS) feature and related artifacts from the Social Program Management deliverable.

Main changes summary

The Generic Search Server (GSS) was used throughout Social Program Management to support enhanced searching capabilities. However, it was decided to deprecate the feature in Social Program Management v7.0.0.0 for various reasons, including poor customer uptake and complex implementation scenarios. It is therefore being removed in this release.

- **Database tables removed**
 - GSSEntity
 - GSSMapperType
 - GSSSyncGap
 - GSSSyncTimestamp
 - SearchService
 - SearchServiceField
 - SearchServiceRow
 - SearchSrcvRowExt
- **Facade classes removed**
 - StartupSearchServer
 - DoGSSSync
 - DoSearch
- **Process classes removed**
 - AdminOptimizeOnlineSearchServices
 - DataBaseIndexPersist
 - DataBaseSearchExtractor
 - SearchController
- **Domain definitions removed**
 - A number of domain definitions have been removed as a result of this exercise. See the detailed changes list below for the full list of these.
- **Struct classes removed**
 - A large number of struct classes have been removed as a result of this exercise. See the detailed changes list below for the full list of these.
- **OSS JAR files removed**
 - commons-dbcp.jar
 - compass.jar
 - lucene-analyzers.jar
 - lucene-core.jar
- **Application properties removed**
 - A large number of application properties have been removed as a result of this exercise. See the detailed changes list below for the full list of these.

- **Codetable files removed**
 - TermOccurs
 - TermType
- **Message files removed**
 - GSSPullMapper
 - GSSQueryValidation
 - GSSSearchServer
 - GSSTrace
- **UIM/VIM/property files removed**
 - A large number of UIM, VIM and associated property files have been removed as a result of this exercise. See the detailed changes list below for the full list of these.

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Technical Infrastructure**
 - **CuramSDEJ**
 - **Edited**
 - classpath
 - **CuramSDEJ/batch**
 - **Removed**
 - DataBaseIndexPersist.properties
 - DataBaseSearchExtractor.properties
 - StartupSearchServer.properties
 - **CuramSDEJ/message**
 - **Removed**
 - GSSPullMapper.xml
 - GSSQueryValidation.xml
 - GSSSearchServer.xml
 - GSSTrace.xml
 - **Domain definitions**
 - **Removed**
 - MAX_NUMBER_OF_HITS
 - ANALYZER_CLASS_NAME
 - OBJ_ROW_ID
 - MAPPER_NAME_STRING
 - SEARCH_SERVICE_STRING
 - SEARCH_INDEX_STRING
 - GSS_ENTITY_STRING
 - GSS_CLASSNAME

- INDEX_EXT_NUMBER
- QUERY_TEXT
- SYNC_NODE_NAME
- SYNC_DATETIME
- INDEX_EXT_NUMBER
- WAIT_PERIOD
- **Struct classes**
 - Removed**
 - curam.core.struct.CuramDocument
 - curam.core.struct.CuramDocumentList
 - curam.core.struct.CuramField
 - curam.core.struct.CuramFieldList

2.8 Index Product Delivery Synchronization class

SPM-124481 tracks the removal of the deprecated `IndexProductDeliverySynchronization` from the Social Program Management deliverable.

Main changes summary

The raising of `PRODUCTDELIVERY.MODIFY` and `PRODUCTDELIVERY.INSERT` events has been added to the product delivery `postcreate` and `postmodify` methods. The old wrapper logic that was used to raise events based on system properties has been removed and this led to the `IndexProductDeliverySynchronization` class being deprecated in Social Program Management v8.0.0.0. It is now being removed in this release.

- **Process class removed**
 - `curam.core.impl.IndexProductDeliverySynchronization`

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Model files**

- **Edited**

- `EJBServer/components/core/model/Packages/Infrastructure/Index Search Synchronization_cat.efx`

- **Process class**

- **Removed**

- `curam.core.impl.IndexProductDeliverySynchronization`

2.9 Legacy Employment Contribution Entities struct classes

SPM-124603 tracks the removal of the remaining artifacts for the Legacy Employment Contribution Entities feature from the Social Program Management deliverable.

Main changes summary

The Contribution Manager was originally intended to provide support for solutions in employment areas such as pensions and UI tax, or any premium type of liability. Most of the artifacts related to this feature were deprecated as part of the v7.0.0.0 release and removed in the Social Program Management v8.0.0.0 release. However, there were some struct and domain definition classes that had not been deprecated and were not removed at that time. These remaining artifacts were deprecated in the Social Program Management v8.0.0.0 release and are now being removed as part of this release.

- **Domain definitions removed**
A number of domain definitions have been removed as a result of this exercise. See the detailed changes list below for the full list of these.
- **Struct classes removed**
A large number of struct classes have been removed as a result of this exercise. See the detailedchanges list below for the full list of these.

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

2.10 Outcome Planning application property

SPM-124474 tracks the removal of the deprecated application property `curam.outcomeplanning.defaultTimelineView` from the Social Program Management deliverable.

Main changes summary

The property `curam.outcomeplanning.defaultTimelineView` was only applicable to an older Flex-based Activity workspace that was removed from the product in Social Program Management v8.0.0.0. The Dojo JavaScript workspace that replaced the Flex widget displays an updated layout and this property is not referenced by that workspace. The property was deprecated in the Social Program Management v8.0.1.0 release and is now being removed as part of this release.

• Application properties removed

- `curam.outcomeplanning.defaultTimelineView`
(`ENV_OUTCOME_PLAN_WORKSPACE_DEFAULT_TIMELINE_VIEW`)

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

• Model files

Edited

- `EJBServer/components/AssessmentPlanning/model/Packages/OutcomePlanning/Facade/Workspace.efx`

• Application property files

Edited

- `EJBServer/components/AssessmentPlanning/properties/Environment.xml`

• Facade classes

Edited

- `curam.outcomeplanning.outcomeplan.facade.impl.OutcomePlanWorkspaceUtil`

2.11 Outdated Verification APIs

SPM-124478 tracks the removal of the outdated APIs used to return application verifications from the Social Program Management deliverable.

Main changes summary

Two outdated verification APIs that were deprecated in Social Program Management v8.0.0.0 are being removed in this release.

- **Facade class functions removed**
 - `ApplicationEvidence.listCaseEvidenceVerificationDetails()`
 - `ApplicationEvidence.listCaseEvidenceOutstandingVerificationDetails()`

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Model files**

- **Edited**

- `EJBServer/components/Intake/model/Packages/Facade/Facade_cat.efx`

- **Facade classes**

- **Edited**

- `curam.intake.facade.impl.ApplicationEvidence`

2.12 Rest APIs for resetting passwords

SPM-124477 tracks the removal of the deprecated Rest APIs for resetting passwords from the Social Program Management deliverable.

Main changes summary

The Social Program Management deliverable previously provided three ‘Reset Password’ Rest APIs. These were deprecated in Social Program Management v8.0.0.0 as customers should provide their own authentication implementation via third-party software. The deprecated Rest APIs are now being removed in this release.

- **Facade class functions removed**
 - UserAccountAPI.resetPasswordWithEmail()
 - UserAccountAPI.resetPasswordWithSecretQuestion()
 - UserAccountAPI.resetPasswordWithExistingPassword

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Initial data**

- Edited**

- EJBServer/components/CitizenWorkspace/data/initial/NORMAL_SECURITYGROUPSID.dmx
 - EJBServer/components/CitizenWorkspace/data/initial/PUBLIC_SECURITYGROUPSID.dmx

- **Model files**

- Edited**

- EJBServer/components/CitizenWorkspace/model/restapis/UserAccounts/UserAccounts.efx

- **Rest API configuration files**

- Edited**

- EJBServer/components/CitizenWorkspace/rest/config/ResourcesConfig.xml

- **Facade classes**

- Edited**

- curam.citizenworkspace.rest.facade.impl.UAUserAccountAPI

2.13 Superseded scan milestone batch jobs

SPM-124482 tracks the removal of the deprecated ScanMilestoneDeliveryStartDate and ScanMilestoneDeliveryEndDate batch jobs from the Social Program Management deliverable.

Main changes summary

The ScanMilestoneDeliveryStartDate and ScanMilestoneDeliveryEndDate batch jobs did not use the batch streaming infrastructure. Corresponding batch jobs were created for these batch jobs which did use the batch streaming infrastructure and these two batch jobs were deprecated in Social Program Management v8.0.0.0. They are now being removed in this Social Program Management release.

- **Process classes removed**
 - curam.core.sl.impl.ScanMilestoneDeliveryEndDate
 - curam.core.sl.impl.ScanMilestoneDeliveryStartDate

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Initial data**
 - Edited**
 - EJBServer/components/ChildServices/data/initial/SECURITYGROUPSID.dmx
 - EJBServer/components/YouthServices/data/demo/SECURITYGROUPSID.dmx
- **Model files**
 - Edited**
 - EJBServer/components/core/model/Packages/Reference Model/Service Layer/MilestoneDelivery/Batch/MilestoneDelivery_cat.efx
- **Batch process files**
 - Removed**
 - EJBServer/components/core/batch/ScanMilestoneDeliveryEndDate.properties
 - EJBServer/components/core/batch/ScanMilestoneDeliveryStartDate.properties
- **Process Classes**
 - Removed**
 - curam.core.sl.impl.ScanMilestoneDeliveryEndDate
 - curam.core.sl.impl.ScanMilestoneDeliveryStartDate

2.14 SLM tag generation

SPM-127973 tracks the removal of the IBM® SLM Tag Generation feature from the Social Program Management deliverable.

Main changes summary

The Social Program Management Platform was able to generate entitlement audit logs as IBM® Software License Metric Tag (.slmtag) files. The IBM® License Metric Tool (ILMT) was then used to translate the files and generate License Consumption Reports. This functionality is being removed in this Social Program Management release.

- **Process classes removed**
 - curam.util.administration.impl.LicenseMetricAdmin
- **Java classes removed**
 - curam.util.internal.SLMTagGenerator
 - curam.util.invoke.SLMTimerBean
- **OSS removed**
 - License_metric_logger.jar

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Process classes**
 - Removed**
 - curam.util.administration.impl.LicenseMetricAdmin
- **Java classes**
 - Removed**
 - curam.util.internal.SLMTagGenerator
 - curam.util.invoke.SLMTimerBean
- **Build script files**
 - Edited**
 - curamSDEJ\bin\app_buildEAR.xml
 - curamSDEJ\bin\app_properties.xml
- **Deployment descriptor files**
 - Edited**
 - ibm-ejb-jar-bnd.xml
 - weblogic-ejb-jar.xml
 - wlp-ejb-jar-bnd.xml

- **OSS and related files**

- **Removed**

- CuramSDEJ\lib\license_metric_logger_2.1.2.jar
 - CuramSDEJ\lib\license_metric_logger.properties

- **Edited**

- CuramSDEJ\lib\third_party_version.properties

2.15 Smart Navigator search page target

SPM-124547 tracks the removal of the deprecated Smart Navigator Search Page Target from the Social Program Management deliverable.

Main changes summary

The Person Search (P_SEARCH) Smart Navigator key word and associated functionality was added initially to demonstrate how to configure the Smart Navigator to quickly launch a page. However, there were multiple search pages at solution level which caused this to fail so it was deprecated in Social Program Management v7.0.5.0. The key word and associated artifacts are being removed in this release.

- **Java classes removed**

- `curam.smartnavigator.target.impl.PersonSearchrPageTargetImpl`

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Codetable files**

- **Edited**

- `EJBServer/components/SmartNavigator/codetable/CT_SearchTarget.ctx`

- **Java classes**

- **Removed**

- `curam.smartnavigator.target.impl.PersonSearchrPageTargetImpl`

2.16 Rich Text Editor Spell Checker

SPM-124564 tracks the removal of the deprecated Rich Text Editor Spell Checker feature and related artifacts from the Social Program Management deliverable.

Main changes summary

The Spell Checker add-on to the rich text editing feature in Social Program Management that is found in functionality such as Notes was deprecated in Social Program Management v7.0.0.0. All supported browsers now include built-in spell-checking capabilities that can be used as an alternative. The artifacts previously associated with this feature are now being removed in this release.

- **Codetable files removed**
 - SpellCheckLocale
- **Application properties removed**
 - curam.spellcheck.enable (ENV_SPELL_ENABLE)

Detailed changes list

The following sections outline in detail the artifacts that have been removed and modified in this code removal.

- **Codetable files**
 - Removed**
 - EJBServer/components/CEFWidgets/codetable/CT_SpellcheckLocale.ctx
- **Application properties**
 - Edited**
 - EJBServer/components/CEFWidgets/codetable/CT_SpellcheckLocale.ctx
 - Removed**
 - curam.spellcheck.enable (ENV_SPELL_ENABLE)
- **JavaScript files**
 - Edited**
 - webclient/components/CEFWidgets/WebContent/cefwidgets/ckeditor_settings/curam_config.js
 - webclient/components/CEFWidgets/WebContent/cefwidgets/ckeditor_settings/curam_readonly_config.js
- **Java classes**
 - Removed**
 - curam.widget.render.utils.DataAccessUtils
 - Edited**
 - curam.widget.render.CEF.RichTextEditRenderer
