Cúram 8.0.2.0 iFix16

CONTENTS

Introduction

Welcome to the Cúram 8.0.2.0 iFix16 release.

This is a cumulative release that incorporates all improvements, resolved issues, and third-party updates in previous 8.0.2.0 iFix releases. For full details, see the release notes for each of the previous iFix releases online at Release Notes.

For product documentation, see Merative Support Docs.

Installation

For full installation instructions, see the Development Environment Installation Guide at [Product Documentation and PDFs.](#)

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Cúram installation are writable.
- Run the Cúram installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download the appropriate version of the Cúram Upgrade Helper from [Merative Support.](#) You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the software.

DT036838, WorkItem:SPM-131316 - Microsoft Word fails to launch, if Microsoft Word has been previously closed in the same browsing session

Issue Description:
When a caseworker is editing a Microsoft Word document for a second successive time, it fails to launch and JavaScript errors can be seen within the browser developer tools console.

User Interface Impact: No

Prerequisites:

1. Log in as a system administrator.
2. Navigate to Microsoft Word Templates under the Communications section in the shortcuts panel.
3. Select the Edit row level action for SDT.
4. Update the values in the Category section dropdowns to All Communication - All Communications and save.

Steps to Reproduce:

1. Log in as a supervisor.
2. Register a person and create a Social Assistance case.
3. Navigate to the Contact tab and select the Communications section.
4. From the content level action menu select New Microsoft Word.
5. On the New Microsoft Word Communication modal, set the Case Participant dropdown value to be the registered person and select Next.
6. Enter a Subject for the communication, select an Address from the Select Address dropdown and click save.
7. Microsoft Word will successfully open.
8. From the Communications section, select the Edit row level action for the newly created Communications Microsoft Word document.
9. Issue: Microsoft Word does not launch and JavaScript errors can be seen within the browser developer tools console.

Resolution:
A caseworker can edit a Microsoft Word document as many times as they like within a session in the Cúram application.

Curam Modules

[Financial Management](#)

Financial Management

WorkItem:SPM-131019 - Extend FCProcessingDtls to support the distribution of payments throughout the week for a Set Benefit Week

Issue Description:
There is no caseID and/or primaryClientID passed into the MaintainFinancialComponent.setNextProcessingDate() API. These are required for a future implementation of a dynamic offset calculation based on case and/or primary client.

User Interface Impact: No

Steps to Reproduce:

N/A

Resolution:
The FCProcessingDtls details struct that's passed into the MaintainFinancialComponent.setNextProcessingDate() API has been extended to support the calculation of a dynamic offset based on case and/or primary client. The delivery of the interface to calculate the dynamic offset is not being delivered here, this will be in a future release. This change future-proofs the application so that the caseID and primaryClientID are set on the FCProcessingDtls struct and passed into MaintainFinancialComponent.setNextProcessingDate(). Where these details are not being assigned implicitly from a financial component entity details struct, the details are set explicitly.

Solutions

Child Welfare

DT036736, WorkItem:SPM-131466 - Text pasted into the Smart Panel field of the Intake Assistant is duplicated

Issue Description:
In Cúram, when copying and pasting the text into the smart panel field of the intake assistant, the pasted text is duplicated.

User Interface Impact: No

Steps to Reproduce:

1. Log in as a Child Welfare intake worker.
2. Navigate to New Intake under Quick Links on the Home page.
3. Create a new Intake and Save.
4. Navigate to the Smart Panel on the Intake Assistant.
5. Paste text into the Smart Panel text editor.
6. Issue: The pasted text is duplicated i.e, the content appears twice in the Smart Panel text editor.

Resolution:

The pasted text is now added to the Smart Panel text editor once and displays correctly.
