Introduction

Welcome to the Cúram 8.0.3.0 iFix6 release.

This is a cumulative release that incorporates all improvements, resolved issues, and third-party updates in previous 8.0.3.0 iFix releases. For full details, see the release notes for each of the previous iFix releases online at [Release Notes](#).

For product documentation, see [Merative Support Docs](#).

System Requirements

For information about the supported software for this release, see the [Prerequisites and supported software](#).

[Back to top](#)

Download

This release is available to download from [Merative Support](#). You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the software.

[Back to top](#)

Security Bulletins

Security Bulletins are now available from [Merative Support](#). You must log in to access Security Bulletins, request access if needed. Select Cúram Support and Software Download, enter your credentials, and open Knowledge Articles to see the Security Bulletins.

[Back to top](#)

Installation

For full installation instructions, see the Development Environment Installation Guide at [Product Documentation and PDFs](#).

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Cúram installation are writable.
- Run the Cúram installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download the appropriate version of the Cúram Upgrade Helper from [Merative Support](#). You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the software.

Accessibility

DT036869, Workitem:SPM-133241 - Screen reader announces invisible non-actionable elements

Issue Description:

The screen reader announces non-focused elements when attention is shifted from the shortcuts panel splitter to a different element

User Interface Impact: No

Steps to Reproduce:

1. Enable a screen reader.
2. Log in as a caseworker.
3. Select the Cases and Outcomes tab, making sure all the tabs are closed on the workspace.
4. Navigate to the shortcuts splitter.
5. Use the down arrow key to navigate to the content.
6. Issue: The screen reader announces non-focused elements when attention is shifted from the shortcuts panel splitter to a different element when all the tabs are closed on the workspace.

Resolution:

The issue is resolved, the screen reader does not read the non-focused elements in the shortcuts panel when attention is shifted to a different element when all the tabs are closed on the workspace.

Look and Feel

DT036336, WorkItem:SPM-133295 - There is no clear differentiation between notes making it more difficult to read

Issue Description:

When a note is appended to and contains text with tables and links, there is little differentiation/spacing between them making them difficult to read.

User Interface Impact: No

Steps to Reproduce:

1. Log in as a caseworker.
2. Navigate to a person home page.
3. Click the Client Contact tab and select the Notes page.
4. Use the New page action to add a note.
5. Include the following in this note, add a table and some hyperlinks, and click Save.
6. Issue: The notes have little separation/spacing between them. This makes it difficult for users to differentiate them.

Resolution:

The CSS for the notes history has been updated to add a horizontal line separator, making the note author/timestamp bold and padding was added in, above and below to help users to differentiate between the notes.

Curam Enterprise Framework

[Administration Suite](#)

Administration Suite

DT036738, WorkItem:SPM-133240 - Selecting a user's business email link is not opening the mail client

Issue Description:

When an administrator clicks on the 'Business Email' field in a user's context panel, the mail client is not opened. A JavaScript error is reported in the browser console.

User Interface Impact: No

Prerequisites:

User should have a valid business email address.

Steps to Reproduce:

1. Log in as an Administrator.
2. Navigate to Administration Workspace.
3. From the Shortcuts panel click on User Search.
4. Search for and open an existing user. Check for a valid business email address, add a valid business email address if blank. Save and close the user.
5. In the context panel, select the business email hyperlink in the Business Email field.
6. Issue: Nothing happens, the mail client does not open. A JavaScript error was reported in the browser console.

Resolution:

This has been resolved, the 'Business Email' field will now open up a new dialog to send an email when an administrator clicks on the email address.
