Introduction

Welcome to HR1 Medicaid Community Engagement Cartridge release.

Supporting information is now available via the Merative Support Portal

To access:

- Log in to Merative Support <https://merative.my.site.com/mysupport/s/>
- Enter your credentials
- Navigate to Knowledge Base, then Article Search, select "Curam Knowledge" as the Data Category Group and then select 'HR1 Medicaid Community Engagement' as the Data Category.
- If you don't yet have access, please submit a request through the portal.

The Medicaid Community Engagement Cartridge contains the required eligibility rules and evidence necessary to determine compliance with federal community engagement requirements for the Medicaid expansion population (in isolation from all other rules necessary for Medicaid eligibility).

- Customers on v8 can meet accelerated timelines without requiring a major product upgrade.
- The cartridge is provided as a ZIP file download.
- Customers must integrate the rules with existing rulesets, UI screens, IEG scripts, verification strategies, and business processes.
- The cartridge is designed to support state-specific requirements through extension.

Installing this release

- [Pre-requisites](#)
- [Download](#)
- [Installation](#)

Pre-requisites

Ensure that all installed third party software versions are consistent with those outlined in the [Supported Hardware and Software](#) section.

Download

This release is available to download from [Merative Support](#). You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the appropriate cartridge ZIP for your environment. *This release is provided as a cartridge that is added to an existing v8.x Income Support installation.*

Verify Download Integrity (SHA-256 Checksums)

To ensure the integrity of your downloaded files:

1. Download the file(s) from the links provided above.
2. Generate the SHA-256 checksum for the downloaded file using a tool such as shasum or certutil. For example:
 - On Linux, run `shasum -a 256 <filename>` in the Terminal.
 - On Windows, run `certutil -hashfile <filename> SHA256` in the Command Prompt.
3. Compare the generated checksum with the corresponding value in the table below.
4. If the checksums match exactly, the file is authentic and has not been tampered with.

Installation

Installation of the HR1 cartridge is performed by adding the cartridge to an existing v8.x Income Support installation.

Detailed installation steps are provided in the `readme.txt` file included in the cartridge ZIP. Follow the instructions in that file to apply the cartridge correctly to your environment.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download the appropriate version of the Cúram Upgrade Helper from [Merative Support](#). You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the software.

Any HR1-specific considerations related to upgrades are described in the `readme.txt` and technical documentation provided with the HR1 cartridge and should be reviewed before starting an upgrade.
