Merative Social Program Management 7.0.10.0 iFix15

CONTENTS

Introduction

Welcome to the Merative Social Program Management 7.0.10.0 iFix15 release.

This is a cumulative release that incorporates all improvements, resolved issues, and third-party updates in previous 7.0.10.0 iFix releases. For full details, see the release notes for each of the previous iFix releases online at Release Notes.

For product documentation, see Merative Support Docs.

Installation

For full installation instructions, see the Development Environment Installation Guide at Product Documentation and PDFs.

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Social Program Management installation are writable.
- Run the Social Program Management installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download instructions for the latest version of the Cúram Upgrade Helper are available from Social Program Management support.

CMIS Adapter

PO08352, WorkItem:SPM-127272 - IBM Social Program Management is making multiple calls to FileNet for a single attachment upload

Issue Description:
When using FileNet and CMIS for document storage, the application is making multiple calls to the FileNet service when uploading documents.

User Interface Impact: No

Prerequisite(s):

1. Login as a system administrator.
2. Select Target Systems under Application Data in the shortcuts panel.
3. Configure SPM with a target system entry for the FileNet server.
4. Select Property Administration under Application Data in the shortcuts panel.
5. Select Content Management Settings in the Category drop-down and click Search.
6. Configure the Content Management properties as required.
7. Publish the changes.

Steps to Reproduce:

1. Login as a caseworker.
2. Navigate to a Person home page.
3. Click on the Client Contact tab and select Attachments.
4. Use the New page action to add an attachment.
5. Provide the necessary attachment details and click Save.
6. Issue: The attachment will be uploaded to the FileNet server, but the version will be 2. There will have been two calls made to the FileNet server instead of one.

Resolution:
The CMIS file upload code has been updated to make only one call during the upload of a document.

Known Issues

Please refer to the Known Issues documented for IBM Cúram Social Program Management 7.0.10.0 on the Support Portal.
