Merative Social Program Management 8.0.2.0 iFix11

CONTENTS

Introduction

Welcome to the Merative Social Program Management 8.0.2.0 iFix11 release.

This is a cumulative release that incorporates all improvements, resolved issues, and third-party updates in previous 8.0.2.0 iFix releases. For full details, see the release notes for each of the previous iFix releases online at [Release Notes.](#)

For product documentation, see [Merative Support Docs.](#)

Installation

For full installation instructions, see the Development Environment Installation Guide at Product Documentation and PDFs.

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Social Program Management installation are writable.
- Run the Social Program Management installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Merative Social Program Management Upgrade Helper contains documentation and tools to help you to upgrade your Merative Social Program Management application codebase and database. The Merative Social Program Management Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. To download the appropriate version of the Merative Social Program Management Upgrade Helper, see the download instructions at Social Program Management support.

Accessibility

DT036630, WorkItem:SPM-127940 - When using a screen reader and pagination is enabled for a list, the paginated list control widget does not identify the current page selected

Issue Description:

When pagination is enabled for a list, screen reader users are not informed of the current selected page when navigating through the paginated list control widget.

User Interface Impact: No

Steps to Reproduce:

1. Enable a screen reader.
2. Log in as an administrator.
3. Expand the shortcuts panel in the Administration Workspace section.
4. Expand the User Interface section and select the Tabs link.
5. Go to the paginated list control widget and step over each numbered page link.
6. Issue: The screen reader does not identify which is the current selected page.

Resolution:

Screen reader users are now informed of the current selected page when navigating through the paginated list control widget.

Widgets

WorkItem:SPM-127863 - Enhanced drop down filter logic

The sorting and filtering logic for non-IEG dropdowns has been enhanced.

By setting a new application property, filtered dropdown options are sorted and displayed in the following order:

1. First, dropdown options that start with the characters that are entered are displayed, for example, entering 'i' returns Iceland.
2. Then, for options that contain more than one word, options that contain a word that starts with the entered characters are displayed, for example, entering 'I' returns Cayman Island.
3. Then, the remaining options that contain the entered characters are displayed, for example, entering 'i' returns Albania.

Technical:
To enable this new filter and sort behaviour set the application property "Text filter and sort options for combo box dropdowns" to true.
